Subject: August NRRB Meeting

David -- based on discussions with key regional folks, it appears that an early August meeting to present the early action remedy for the Passaic River site may be a bit too early. We are addressing issues raised by CSTAG's recent review of the site and are continuing to collect data to support the conceptual site model. We believe that an extra few weeks will be adequate to complete the additional work. At this point, we feel that we could be ready for a late August meeting -- meaning that the board site review package would be available by late July. Please let us know if this is doable. Thanks again for your help in dealing with this highly visible and complex site.
